

EVERYTHING NON-BIM

Pete Allinson

BIM

Building
Information
Modelling

Does every
project need
to be BIM?

It's time
consuming

It's
expensive!

Can I buy
BIM?

It's a
model!

Do I have to
have a process
for everything?

I have a
REVIT licence,
am I BIM?

WHY DO YOU BIM?

THE OVERARCHING APPROACH TO IMPLEMENTING BIM IN THE UK

- ◆ Provides independent and impartial evidence
- ◆ Differentiate your BIM projects
- ◆ Prove your credentials in relation to the industry recognized standard
- ◆ Assessment of project deliverables

- ◆ Demonstrate your BIM maturity in the marketplace
- ◆ Embed collaboration on BIM projects across the supply chain
- ◆ Measure client satisfaction
- ◆ Gain a competitive edge when bidding for BIM tenders

SO WHAT'S LEFT?

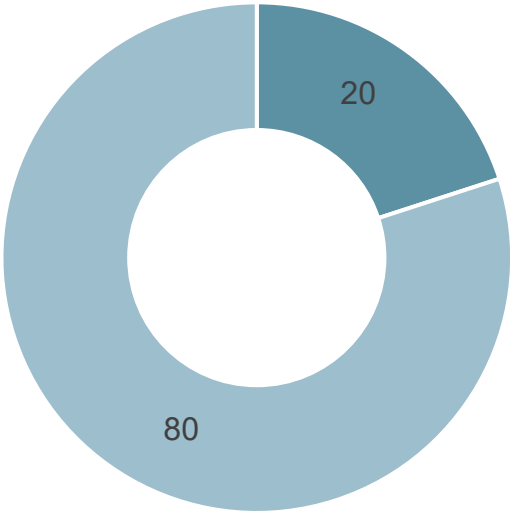

WELL...

USABILITY

[,ju:zə'biləti]

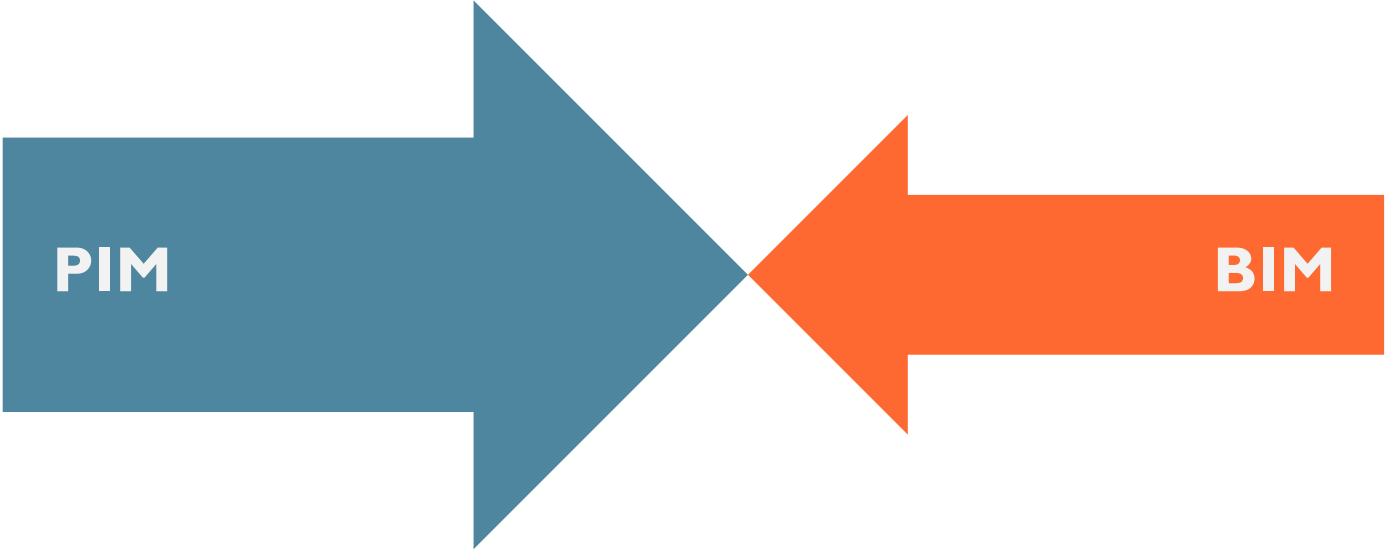

NOUN

1. the degree to which something is able or fit to be used.
2. "it was important to measure the usability of each product"

The Power of Project Information Management

Newforma created the Project Information Management (PIM) software category to improve information management, communication, and efficiency across the design-build project lifecycle.

We support you in improving your project information management – without forcing you to move your data.

We build on the foundation you have created by bringing intelligence to your data – not the other way around.

Newforma advises businesses in the UK's AECO industry for over 12 years.

Our team is from industry and therefore understand your needs.

We care about long-lasting partnerships, we cherish our customers and love to see them grow over the years.

We are here to help and that doesn't always mean Project Center.

Bringing Intelligence to your Data
